

# Notice to Surveyors

**T5/2021**

## Seeking members for 3D Surveying Reference Group

Would you like to assist Landgate in developing a three-dimensional (3D) cadastral system?

Do you want to help shape the future of 3D cadastral surveying in Western Australia?

Landgate is participating in the Intergovernmental Committee for Survey and Mapping (ICSM) 3D Cadastral Survey Data Model and Exchange (3DCSDM) project. The aim is to create a widely adopted standard across Australia and New Zealand for exchanging digital cadastral survey information between the survey industry and government land registries.

We want to fully enable the digital exchange of cadastral information, and particularly enable surveyors to transition from lodging PDF plans to fully digital data, including 3D elements.

The purpose of the 3D Surveying Reference Group (3DSRG) is to review relevant documents and provide advice and assistance about 3D cadastral surveying practices and processes to Landgate as it develops a 3D cadastral system.

We are seeking representatives from the land surveying profession with expertise in cadastral surveying, plan creation and spatial data.

Ideally, the participating firms will contribute one licensed land surveyor and one draftsman/spatial data expert to the 3DSRG.

As members of the reference group, you will need to commit to participating in a monthly meeting.

If all this interests you, please direct any further enquiries and express your interest to Murray Dolling via:

Telephone: (08) 9273 5949 or

Email: [murray.dolling@landgate.wa.gov.au](mailto:murray.dolling@landgate.wa.gov.au)

Expressions of interest close: 9am Monday, 4 October 2021

A handwritten signature in black ink, appearing to read "M. Dolling".
